Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 17-21, 31-34, 37-41, 51 and 53 are rejected under 35 U.S.C. 102(b) as being anticipated by Tallman (USPN 4663511).

Tallman teaches an arrangement for monitoring welding (col 3 lines 11-20) comprising a camera (col 8 lines 4-8 and col 2 lines 63-65) for reproducing the welding area, UV illuminating means (col 5 lines 45-61) and a band filter (col 4 lines 29-62). Weld size and shape can be measured (col 3 lines 38-45). Welding parameters and processes are controlled and corrected (col 4 lines 63-68), including position and geometry of the melt (col 3 lines 38-45 and col 4 lines 63-68). Wavelengths around UV are typically between 250 and 450 nm.

3. Claims 17-21, 35-41 and 51-54 are rejected under 35 U.S.C. 102(e) as being anticipated by Katsuta et al. (US 2002/0154811 A1).

Art Unit: 1725

Katsuta teaches an arrangement and computer program (abstract, paragraph 50 and figure 1) for monitoring welding (paragraphs 16 and 45) comprising a camera with a diaphragm (shutter) and computer (paragraph 17) for reproducing the welding area, UV illuminating means (paragraph 119) and a band filter (paragraph 119). Weld size and shape can be measured. Welding parameters and processes are controlled and corrected, including position and geometry of the melt (figure 12 and paragraph 16). Wavelengths around UV are typically between 250 and 450 nm.

Response to Arguments

4. Applicant's arguments with respect to claims 17-36 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Claims 22-30, 42-50, 55 and 56 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1725

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toda et al. (JPN 05-217335A, UV source), Dostoomian et al. (USPN 4359622, UV source).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynne Edmondson whose telephone number is (571) 272-1172. The examiner can normally be reached on Monday through Thursday from 6:30 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
